News Release 2001-19

November 29, 2001

### **Joint Venture with Gold Fields in Guatemala**

Radius Explorations Ltd. is pleased to announce that a Letter of Intent has been signed with a subsidiary of Gold Fields Limited regarding a Joint Venture on the Tambor and Bella Vista Projects in Guatemala.

The Joint Venture gives Gold Fields the right to earn a 55% interest in the project lands by spending US\$5 million over 3.5 years. These expenditures are staged with an initial US\$1.5 million minimum over the first 18 months after the signing of a formal joint venture agreement and a further US\$3.5 million over the following 24 months. Upon completion of the US\$5 million expenditure, Gold Fields will be vested with a 55% interest in the subject properties and Radius will retain a 45% interest. Following this earn-in, Radius will have 180 days to either make a one-time election to fund its prorata share of continuing exploration expenditures or grant Gold Fields the right to earn a further 15% interest in the lands. In consideration for the further 15% interest, Gold Fields will fund all exploration and development costs to receipt of a bankable feasibility study.

The concessions that are subject to this arrangement comprise the western portion or approximately 225 square kilometers of the total 3,300 square kilometers of concessions that Radius controls in Guatemala. Gold Fields will operate the program on the concessions that apply to the Joint Venture.

The Joint Venture is subject to completion of a formal Joint Venture Agreement and approval by the appropriate regulatory authorities.

During the past two years the Company has defined a significant new gold belt in central Guatemala. This belt is located within and related to the collision plate boundary between the North American and Caribbean Plates. The Company has compiled an extensive land package that covers the majority of a 250 km portion of this belt and has investigated and documented gold occurrences along 150 km of strike length.

The Company has commenced an exploration program on concessions outside of the Joint Venture Lands in which the Company retains a 100% ownership. Radius is well financed with a treasury of \$3 million. Gold Fields owns a 12% equity interest in Radius.

For more information on the Company, please visit our web site at [www.radiusgold.com](http://www.radiusgold.com).

News Release 2002-01

January 16, 2002

### **Exploration Update For 2001**

Radius Explorations is pleased to present a summary of exploration activities for 2001 and planned activities for 2002. The Company was successful in completing significant financings during the past year and while the junior exploration sector was largely dormant, Radius aggressively advanced a portfolio of properties in Guatemala.

In 2001 Radius formed an association with the South African major Gold Fields Ltd. Gold Fields became a significant shareholder of Radius and also entered into a letter of intent concerning a joint venture on a portion of our land holdings in Guatemala. The joint venture will enable Gold Fields to earn a 55% interest in the Tambor Properties through the expenditure of US\$5.0 million over 3.5 years. Additionally, the joint venture will enable Radius to focus efforts on developing our extensive land holdings while continuing to benefit from Gold Fields advancing the known prospects through the feasibility stage.

Radius has focused attention for the last two years on central Guatemala and has successfully generated numerous gold discoveries through prospecting and stream sediment sampling. The area is host to a plate tectonic boundary between the Caribbean and North American Plates, which forms a major suture zone. The Company controls over 3,000 square km of mineral concessions within this suture zone and retains a 100% interest in 2,700 square km. We are conducting an aggressive exploration program on the 100% owned properties and will release a summary of these activities and results obtained on these prospects shortly. Due to the successful financing during 2001 Radius is well funded for the exploration programs planned in the coming year.

On December 1st 2001 Gold Fields took over as operator of the Bella Vista, Tambor and Tierra Blanca Prospects. The exploration program on these prospects continued with a smooth transition and results obtained during 2001 are summarized below.

#### **Bella Vista Project**

The Bella Vista Project is located 15 km north of Guatemala City and 8 km west of the Tambor Project. Radius discovered the prospect in 2001 and completed an exploration program that included the establishment of 100 line-km of grid and soil sampling.

Gold Fields has evaluated the Bella Vista soil database and has summarized the results as follows "Nine major gold-in-soil anomalies have been identified in the Bella Vista area

based on a grid soil survey comprised of 3958 samples collected over an approximate 11 square km area."

The grid area was also geologically mapped and over 1400 rock samples were collected along the 7 km long Bella Vista gold trend. Reconnaissance rock sampling succeeded in tying the soil anomalies to bedrock sources and a number of visible gold occurrences in quartz veins and quartz stockworks were located. A total of 15 hand trenches were excavated on 6 of the 9 known soil anomalies, the best of these returned 44m @ 6.15 g/t. The trench results have been compiled by Gold Fields and are summarized on the attached table.

### **Tambor Gold Project**

During 2001 Radius completed a detailed surface exploration program on the Tambor Gold Project located one hour north of Guatemala City. A series of gold anomalies along a 6 km trend hosted by metamorphic schists was investigated. Hand trenching indicated targets worthy of drilling and a total of 30 reverse circulation and diamond drill holes were completed on three zones. Drilling on the Sastre and Bridge Zones was largely disappointing, however, subsequent analysis at Sastre suggests that the target was not sufficiently tested by the drilling. The Lupita Zone holes cut significant mineralized intervals in three holes including 1.22 g/t gold over 135.6 m, 2.1 g/t gold over 25.9 m and 1.91 g/t gold over 29.0 m. The gold mineralization was found to be structurally complex and Gold Fields is re-evaluating the zones and data sets and will implement the necessary work programs.

### **Tierra Blanca Project**

The Tierra Blanca Project is located 20 km north of Guatemala City and encompasses a strong gold in rock anomaly within limestones and phyllites. The zone has been traced for 3 km in an east-west direction by widely spaced rock chip sampling. The mineralization is epithermal in nature and differs from the mesothermal mineralization found at Bella Vista and Tambor. Gold Fields has hired additional staff to advance the Tierra Blanca to the drill stage.

Tim R. Osler	Secretary

**SCHEDULE C – MANAGEMENT DISCUSSION AND ANALYSIS**  
**(for the nine month period ended September 30, 2001)**

Radius Explorations Ltd. is in the business of acquiring, exploring and developing mineral properties.

During the first half of 2001, the Company continued trenching at the Tambor Property in Guatemala, resulting in the advancement of five separate zones to the drill stage. Following the trenching program, Radius extended its property position along a belt of prospective sedimentary rocks to the west of Tambor, acquired new prospects within the belt, and commenced a regional exploration program.

Since the previous quarter end, the Company raised in excess of \$2,000,000 through equity financings, these funds enabling the Company to expand its land holdings in Guatemala and to commence an aggressive reconnaissance program to identify new prospective areas in the country. Drilling on the Tambor property in Guatemala commenced in the first weeks of this present quarter and continued through the quarter end. Results of the drilling were mixed, indicating significant further expenditures would be needed to identify a resource on the property. Discussions were commenced with several major mining companies regarding a joint-venture on the property.

The Company extended the mineralization at the Tambor property over a strike length of some 10 kilometers. We have also demonstrated through trenching and drilling that economic gold grades can be obtained on the property. A better understanding of the geological controls on the deposition of the gold is needed in order to establish a mineable gold deposit.

Following the quarter end, the Company signed a joint venture on the Tambor prospect with Gold Fields Exploration, a subsidiary of Gold Fields Limited of South Africa, one of the largest gold mining companies in the world. The agreement calls for Goldfields to expend US\$5 million on the property over 3.5 years in order to earn a 55% interest in the prospect. Following the earn-in, Radius will have a one-time decision to retain its 45% interest by anteing-up its proportion of expenditures going forward or elect to be diluted to a 30% interest by being carried through to a full feasibility study.

This agreement allows Radius to conserve its treasury while Goldfields develops this exciting project, and also frees up Radius's geological staff to continue with the generative work in Guatemala which to date has proven so successful in discovering new exciting projects.

Details of financings completed by Radius during the nine months ended September 30, 2001 are as follows:

Previously Disclosed Financings	Previously Disclosed Use of Proceeds	Actual Use of Proceeds During the Reporting Period
\$824,000 private placement closed on March 1, 2001	\$824,000 Guatemala projects	\$824,000 Guatemala projects
\$711,375 private placement closed on June 8, 2001	\$711,375 Guatemala projects & gen. corporate	\$711,375 Guatemala projects & gen. corporate
\$945,000 private placement closed on June 15, 2001	\$945,000 Guatemala projects & gen. corporate	\$945,000 Guatemala projects & gen. corporate
\$2,000,000 private placement closed on July 17, 2001	2,000,000 Tambor Project, Guatemala	\$0 Tambor Project, Guatemala
	<u>\$4,480,375</u>	<u>\$2,480,375</u>

In addition to the foregoing financings, the Company received approximately \$1.35 million from the exercise of previously issued private placement warrants. As at September 30, 2001, the Company had working capital of approximately \$3.3 million.

ON BEHALF OF THE BOARD OF DIRECTORS,

*"signed"*

Simon Ridgway, President
